

FUN WITH LEAVES

These fun leaf based activities will help your child with the language of maths, and developing their fine motor skills.

SORT AND COMPARE

Sort the leaves you have collected into order from biggest to smallest. Take turns and asking, "What comes next?"

SORT AND GROUP

How many ways can you sort your leaves into groups? You could try shape, colour, size, texture or even smell.

GET CREATIVE

Try some leaf rubbing by peeling the paper from old crayons. Place your leaves under thin paper and rub with the side of the crayon flat to the paper.

Make some 'leaf beasties' by drawing faces on your leaves with felt pens.
