

# HIDE AND SEEK

These hide and seek activities will help your child with the language of maths, counting and listening skills.

## FINDING FUN

Use your child's favourite toy to play hide and seek with a difference, using maths words.

E.g. Can you hide teddy inside something?  
Can you find teddy hiding below something big?

on / under / beside / below / over  
near / far / inside / outside / big / little

Enjoy a traditional game of traditional hide and seek together in a safe enclosed space. It's a great way to practise counting to 10 !
