

PRACTICAL 'WHAT IF' FOG BUSTING

- Write your problem in the top box and then write a list of all the things that could possibly go wrong in the boxes below.
- Use the gauge to decide on the likelihood of the 'what if' happening.
- If your 'what if' statement might happen, use the box opposite to think of a strategy to deal with it should you need it.

What ifhappens?	<p>LIKELIHOOD GAUGE</p>	I could try
-----------------------	--------------------------------	-------------------

What ifhappens?	<p>LIKELIHOOD GAUGE</p>	I could try
-----------------------	--------------------------------	-------------------

What ifhappens?	<p>LIKELIHOOD GAUGE</p>	I could try
-----------------------	--------------------------------	-------------------

What ifhappens?	<p>LIKELIHOOD GAUGE</p>	I could try
