

YETI SAFETY INSPECTORS

Part of your job as new yeti keepers is to make sure your yetis are safe at night when out in the playground playing hide and seek.

- Colour your hats with the children then assemble the strips to their head circumference using a stapler (remove from head first).
- Explore potential hiding places in the playground with your group, and record 5 of the most prominent places capturing what the children tell you about each for the map making activity.
